

President

Envi Network

Location: Newmarket

Envi Network is a start-up data infrastructure company based in Newmarket. Its goal is to drive economic development in the communities it serves. It will operate as a true fibre-optic Internet Services Provider (ISP), equipping the communities it services for the digital evolution and their Smart City strategies. Envi Network is a standalone company jointly owned by the municipalities of Newmarket and Tay. It will provide the network infrastructure required, but not yet in place, for the coming opportunities and challenges of the Internet of Things. Envi's growth will come through offering exceptional service, unparalleled service level agreements and competitive pricing to enable economic development opportunities in the communities it serves. Its initial focus will be on providing internet service to Municipal, Universities, Schools and Hospitals (MUSH) and business sectors. The network is also now the internet service provider of choice for the Corporation of Newmarket and Newmarket-Tay Power Distribution.

Reporting to the Board of Directors, the first President of Envi Network will work closely with the Board to build on the strategy and operations plan for the organization, with key milestones and dates, as well as recruit and develop a collaborative, high performing team. Key deliverables include building a company that addresses customers' needs, mobilizes technology, embraces change, and enables economic opportunities. Key responsibilities include fiscal and risk management and ensuring compliance with all federal and provincial regulations. The successful candidate must understand the demands of building a new commercial enterprise, be a strong communicator and ensure that Envi is positioned to achieve its planned objectives.

As the ideal candidate, you are an experienced senior executive with a successful background in leading people, establishing and managing budgets, marketing, sales, and public and subscriber relations. Ideally, you have experience in the data infrastructure industry and an understanding of the many facets of being an Internet Service Provider. You have an innovative, results-oriented approach and the ability to build meaningful relationships with all levels of clientele. You are highly sensitive to the needs of customers and other key stakeholder groups and have the ability to assimilate and understand new information quickly and learn rapidly, including new technologies.
